Data 数据

Big Data
recognize
award

We still don't know how significant the long-term impact is going to be of unwise things that kids put on social media (and) that come back and bite them in 20 years' time.

Shadbolt, who gave evidence to the committee, says (that) the problem is that we don't know how companies will use our data because their business models and uses of data are still evolving.

那个很帅的李老师指出学生的问题就是学生们不知道如何背单词因为他们太笨了。

TL who is extremely handsome figures out that the students' barrier/hardship is that they don't know how they can memorize vocabulary because they are dramatically stupid.

A star is born

A soulmate is gone

The shock and anger when a social media firm does something with data that people don't expect, even if users have apparently given permission, show that the current situation isn't working.

Shadbolt, who gave evidence to the committee, **says (that) the problem is that we don't know** how companies will use our data because their business models and uses of data are still evolving.

Adam Gazzaley, a researcher at the University of California, who was not a member of the research group, **said one limitation of the study** was that it couldn't find out whether people who start out less focused tend toward multitasking or whether people's recognizing and understanding abilities change as a result of multitasking.
