绿里 green mile

(1) When we high school students, are learning English which is an international language, we always focus on the differences between English and Chinese without noticing their similarities (out). (2) However, comparing the two languages, we can finally find that their similarities can help us overcome the difficulties in learning English.

(3) True as it sounds, it is not easy to do so, though. (4) It is indeed a problem to solve.

(5) When I was a freshman in senior high, what puzzled me in learning English was that I met the same problem that I didn't know how I could summarize the differences and the similarities between the two languages, which really made me puzzled for couples of days.

(6) Afterwards, it was a coincidence that I came into Teacher Li' s English curriculum. (7) From that moment on, every time I sat in the classroom, I felt so excited that my attention was immediately drawn by his logical presentation (which was combined with high-quality class show videos. (8) Miracles happened everyday that I found the way out. (9) Humorous and passionate, Teacher Li was always able to show us a better way to understand English structure and vocabulary. (10) Along with his face to face courses was the extra service provided by the English teaching assistants working in his team that I could make a reservation for one-to-one tutoring. (11) Guess what? (12) It' s free! (13) Awesome right? (14) Anyhow, Teacher Li' s team is going to help you whenever you need.
